RP Select Opportunities Strategy

RP Select Opportunities Fund ("SOF") is a long-short fixed income strategy which targets an absolute return of 8% to 10% (net of fees). The strategy utilizes active trading, long-short pairs, interest-rate management and leverage to achieve its return and risk targets. SOF aims to produce these returns in all interest rate and credit spread environments with a focus on long term capital preservation. The SOF strategy can tactically allocate between investment grade and high yield markets.

YTM Capital Mortgage Income Fund

The Fund seeks to preserve capital and to pay stable monthly income by investing primarily in short-term mortgages secured by real estate. YTM is a conservative manager that employs a rigorous underwriting process and active risk management strategies. It primarily invests Fund assets in a well diversified portfolio of residential, owner-occupied single family mortgages in urban areas. A significant number of these mortgages are insured. The Fund also invests in construction and commercial mortgages with low loan-to-value ratios.

Terminology

Standard Deviation: A measure used to quantify the amount of variation or dispersion of a set of data values. A low standard deviation indicates that the data points tend to be close to the mean (expected value) of the set, while a high standard deviation indicates that the data points are spread out over a wider range of values. The lower the standard deviation, the less volatile a fund is.

Calculations based on 4-year annualized

Sharpe ratio: Compares a fund's returns to the returns of a risk-free benchmark. It is calculated as the ratio of the average excess return to the standard deviation of these excesses. Funds with higher, more consistent return histories have a higher Sharpe ratio than similar funds with lower or more volatile returns.

Calculations based on 4-year annualized

Best ROR: Highest monthly rate of return within the most recent 5 year period

Worst ROR: Lowest monthly rate of return within the most recent 5 year period

% Negative Months: Percentage of monthly rate of returns below zero within the most recent 5 year period

% Positive Months: Percentage of monthly rate of returns above zero within the most recent 5 year period

ESG Integration: The ESG symbol represents that the product employs a framework for ESG Integration into the investment process.

The PRI (Principles for Responsible Investment) defines ESG integration as "the explicit and systematic inclusion of ESG issues in investment analysis and investment decisions." Put another way, ESG integration is the analysis of all material factors in investment analysis and investment decisions, including environmental, social, and governance (ESG) factors.
