## Optimum Integrated Bond Universe

The Optimum Integrated Bond Universe strategy is based on active management by a team of experienced managers. The sources of value added from active management are attributed largely to sector allocation and securities selection. This bottom-up asset management strategy focuses on credit research from data provided by our quantitative and fundamental analyses, as well as our macroanalyses. Securities are selected with our Big Data tool, an exclusive system developed internally. This decision-making platform enhances traditional fundamental and macroeconomic approaches.

Franklin Canadian Core Plus Bond Fund - Series O

**FRANKLIN  
TEMPLETON**

This Fund seeks high current income and some long-term capital appreciation by investing primarily in Canadian federal and provincial government and corporate bonds, debentures and short-term notes. The Fund maintains an over-weighted position in high-quality corporate and provincial issues and an under-weighted position in Canadian federal bonds. The Fund may invest in foreign securities.

## RP Strategic Income Plus Strategy

The RP Strategic Income Plus Fund was created for investors seeking a credit solution with the potential to produce better total returns than government securities alone while prioritizing capital preservation. Global diversification. The fund invests in the corporate debt of developed nations providing broad portfolio diversification and a lower correlation to Canadian assets. Added value from active management. RPIA employs rigorous bottom up research and relative value monitoring to extract value from inefficiencies in the global bond market aiming to produce superior returns with less risk.

## Fiera Canadian Equity Fossil Fuel Free Ethical Composite

The long-term success of our Canadian Equity Strategy is rooted in a quality investment philosophy. The aim of such an approach is to invest in businesses for the long-term (not trade stocks) that are profitable and well-established with durable, defensible attributes and can generate good returns on investment. We believe a focus on quality businesses combined with our disciplined approach to valuation and long-term holding period will continue to compound wealth for our clients.

## CC&L Canadian Small Cap Fund

CC&L's core approach invests on the basis of "growth at a reasonable price" and is founded on a disciplined and consistent investment process that has been in place since the inception of the firm. The process incorporates top-down research integrated with a major focus on fundamental bottom-up security selection with a clear recognition that price attractiveness of valuation must play a key role in the investment process. The result is a portfolio that is well diversified, has an attractive long-term risk/reward profile and exhibits long-term growth well in excess of the market.

## Sionna High Conviction Composite

Sionna's High Conviction strategy invests in Global companies across the capitalization range and without reference to sector weights. To qualify for inclusion, companies must have a minimum market cap of C\$200 million. The portfolio is total-return oriented and uses a benchmark-agnostic approach to portfolio construction. Companies must be trading at a sufficient discount to Sionna's calculated intrinsic value and demonstrate attractive quality and risk/return attributes before they can be considered for inclusion. The portfolio will be unconstrained; as a result, holdings and position sizes may differ from Sionna's other core mandates.

## Montrusco Bolton Global Equity Fund

The fundamental investment objective of the Global Equity Fund is to achieve long-term growth of capital through the investment of its assets mainly in equity markets around the world. The Fund will contain between 30 to 65 securities. The portfolio is focused on owning the best stocks based on our research, regardless of where they are located in the world. Consequently, weightings in individual countries and sectors can vary widely from the MSCI World Index. To provide adequate diversification, the Fund will at all times be invested in major regions of MSCI World Index and the stocks will be spread over a minimum of 7 of the 11 GICS sectors

## U.S. Small Cap Value Equity

The Brandes U.S. Small Cap Value Equity Strategy seeks long-term capital appreciation by investing primarily in the equity securities of U.S. issuers with equity market capitalizations of US\$5 billion or less at the time of purchase. The relevant index for diversification measurement is the Russell 2000 Index.

## Emerging Markets Small Cap Equity

The Emerging Markets Small Cap Equity strategy identifies more than 3,500 emerging markets small cap stocks for potential investment, ranking the entire universe, from most attractive to least attractive, utilizing the bottom-up, fundamental measures of business improvement, growth sustainability, and relative value. As a systematic, bottom-up investor, we quantitatively rank all stocks in the universe, then verify each buy and sell decision through a qualitative review performed by the portfolio management team. Each portfolio is built on a stock-by-stock basis, typically holding 125-175 stocks.

# Terminology

**Standard Deviation:** A measure used to quantify the amount of variation or dispersion of a set of data values. A low standard deviation indicates that the data points tend to be close to the mean (expected value) of the set, while a high standard deviation indicates that the data points are spread out over a wider range of values. The lower the standard deviation, the less volatile a fund is.

**Sharpe ratio:** Compares a fund's returns to the returns of a risk-free benchmark. It is calculated as the ratio of the average excess return to the standard deviation of these excesses. Funds with higher, more consistent return histories have a higher Sharpe ratio than similar funds with lower or more volatile returns.

**Information ratio:** This measure is a more general case of the Sharpe ratio. The calculation is the same as the Sharpe ratio, but any appropriate benchmark can be used instead of a risk-free rate. It is calculated as the ratio of the average excess return to the standard deviation of these excesses. Funds with return histories consistently above their benchmark have a higher Information ratio than similar funds with lower or more volatile returns. The higher ratio is better.

**Tracking Error:** Is the standard deviation of the difference between the returns of a fund and its benchmark. Shows a fund's consistency versus a benchmark over a given time period. A low number indicates that the fund's performance is close to the benchmark, a high number indicates that it's farther away.

**Up capture:** A measure of the fund's performance in up markets relative to the market itself. If upside is  $>100$ , the fund outperformed during positive returns. A value of 110 suggests the manager performs 10% better than the market when the market is up during the selected time period.

**Down capture:** A measure of the fund's performance in down markets relative to the market itself. If downside is  $< 100$ , the fund lost less during negative returns. A value of 90 suggests the manager's loss is only 9/10th of the market loss during the selected time period.

**Beta:** Measures volatility (systematic risk) compared to the benchmark. Helps investors understand whether a fund moves in the same direction as the rest of the market and how volatile it is compared to the market. If the number is  $>1$ , the fund is more volatile. If the number is  $< 1$ , the fund is less volatile. A number of 1.2 indicates that the fund is 20% more volatile than the benchmark.

**Up market return:** The annualized return for a fund during up markets, defined as periods where the return of the benchmark is greater than or equal to zero.

**Down market return:** The annualized return for a Manager during down markets, defined as periods when the return of the benchmark was less than zero.

**Quartile rank:** Divides the data set into four equal parts (1,2,3,4). The higher the rank, the better. Indicates how a fund has performed relative to its peers.

**Percentile rank:** Divides the data set into 100 equal parts (1-100). The higher the rank the better. Indicates how a fund has performed relative to its peers.

**ESG Integration:** The ESG symbol represents that the product employs a framework for ESG Integration into the investment process. The PRI (Principles for Responsible Investment) defines ESG integration as "the explicit and systematic inclusion of ESG issues in investment analysis and investment decisions." Put another way, ESG integration is the analysis of all material factors in investment analysis and investment decisions, including environmental, social, and governance (ESG) factors.
